SAFETY BUMP CAP SCARAP 2

The Surflex bump cap (or anti-collision cap), called Scarap2, is innovative personal protective equipment designed for workers head protection. It consists on a textile jacket of nylon with a baseball style and a protective ergonomic helmet of ABS whose interior is covered with a foam EVA (ethylene vinyl acetate) that cushions the blows on the head. Its comfort and lightness are greatly appreciated by employees who wear it and it is safe equipment ensuring the well-being in their work environment.

Utilization:

This product is in agreement with the protection requirements of users for applications in commercial, industrial or recreational works whose risks have a low impact. This product is certified EN 812 (European agreement) and it is useful in situations where the wearing of a security helmet seems exaggerated. But also in workplace with risk of shocks and bumps of the head (warehouses, assembly lines, laboratories, building work indoors, garages, engineering ...). Thus, the use of a bump cap is efficient not only in the sectors of aerospace, automobile, retail, but also transportation, logistics, crafts and even the police!

EN812:2012

EN 812:2012 relates to bump cap of current use. They are used in the industry to protect the head when it hits hard and static objects that can stun or cause lacerations and superficial injury to the wearer.

They are primarily intended for indoor use but can also be used outside for some businesses.

EN 812 gives the buyer of the Surflex bump cap peace and security during purchases and after purchases.

Bump cap is not designed to protect from the effects of falling objects and mustn't replace a protection helmet of industry according to EN 397.

One of the major advantages of the bump cap is undoubtedly its comfort. It is not bulky and it is slightly (+/- 170 g), which provides greater stability. The ABS helmet is removed and replaced easily because it is fixed by Velcro. The visor is made with plastic which makes the washing machine of the cap very easy.

The large size of 56-64 cm facilitates the management of orders and there is a quick and safe regulating system by Velcro which allows the use for all types of heads. When the cap is worn, it does not move and provides comfort to the user throughout the day. It is waterproof and offers a solution to moisture through its anti-sweat band, the ventilation system located on both sides of the cap and EVA (ethylene vinyl acetate). In addition to being vented, the EVA foam is a very durable material which absorbs blows. The design of our bump cap has for objective to be able to combine breathability, comfort and effective protection.
